1. Evidence-based Planning

Effective master plan starts with analysis based on a set of scientific data to capture a variety of aspects of urbanization.

How to ensure “integrity”, balancing economic, social and environmental aspects of urbanization?

How to ensure stakeholder participation to capture their needs?

How to prioritize and put them into the right sequencing?

2. Integrated Planning

3. Participatory Planning

How to ensure stakeholder participation to capture their needs? How to prioritize and put them into the right sequencing?

Key Challenges for Master Plan/ Integrated Urban Development

SDGS GOAL 11: SUSTAINABLE CITIES AND COMMUNITIES

Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable

11.1 Housing, basic services, upgrading slums

11.2 Sustainable transportation system

11.3 Capacity for participatory, planning and management

11.4 World cultural and natural heritage

11.5 Disaster prevention

11.6 Environmental impact

11.7 Green and public spaces

11.8 Links between urban, peri-urban and rural areas

11.9 Disaster risk management

11.10 Sustainable and resilient buildings

Goal 11 is major target for Urban, but there are also other major targets with linking Urban.

Toward Sustainable Cities “JICA’s New Challenge”

A Research on Sustainable Cities in Developing Countries (JICA, 2015)

Way Forward: JICA will apply results of this study in a new program focusing on urban sustainability and will include in existing one. It will also continue to review and improve its policy to promote sustainable urban development.

JICA Partnership Program

Collaboration with Local Government, Community

JICA Knowledge Co-Creation Program on transforming cities for sustainability – What’s the future city?

From 2017 to 2019 (3 years program)
